ABSTRACT

Results of the College Board's Annual Survey of Colleges for 1986-1987 are presented, with attention to fall 1985 enrollment at 3,093 two-year and four-year institutions. The universe of surveyed institutions is described by control and type, and the percentage distributions in each category are indicated. Statistical tables provide: comparisons of undergraduate enrollments for fall 1984 and 1985 by control and type; comparisons of undergraduate enrollments for fall 1984 and 1985 by attendance status (full-time and part-time enrollments); data on first-time freshman enrollments, including breakdowns by sex; and graduate enrollments for fall 1984 and 1985 at the surveyed institutions and at an additional 167 institutions that offer graduate study only. For both undergradaute and graduate 1985 enrollment tables, information is provided on state totals followed by institutions in alphabetical order within the state. The following information appears in tabular form for both the undergraduate and graduate levels: full-time and part-time enrollments (total, men, women); first-time freshmen enrollment; and total students enrolled (including undergraduate and graduate). INTRODUCTION

The College Board has been collecting information about colleges for over forty years; since 1977 these data have been maintained in an annually revised electronic data base, which is used to produce the Board's major guidance publications, such as The College Handbook, and to supply college information to the research community and the general public. This report provides information on fall 1985 enrollment at more than 3,000 colleges and universities in the United States that offer undergraduate study. It is intended to meet the recognized need of educational researchers for detailed and timely data on enrollments at postsecondary institutions.

The Survey

The data were collected on the Annual Survey of Colleges (ASC), 1986-87. The questionnaire was mailed in December 1985 to all institutions offering an undergraduate degree and certified at that time by the Division of Eligibility and Agency Evaluation of the U.S. Department of Education, Office of Postsecondary Education as having met one of the following criteria.

- The institution is accredited at the college level by an agency that has been listed as nationally recognized by the Secretary of Education.
- The institution holds preaccredited status at the college level with a designated nationally recognized accrediting agency.
- If the institution is public or nonprofit, it has qualified under the "three-institutional-certification method" established by Section 1201 (a) (5) (B) of the Higher Education Act of 1965. By this method, the Secretary of Education verifies that not fewer than three accredited college-level institutions have accepted and do accept an unaccredited institution's credits, upon transfer, as though coming from an institution accredited by a nationally recognized accrediting agency.

Questionnaires were received and processed by an in-house editorial staff from January through June 1986. Institutions that did not return ASC questionnaires were contacted by telephone and basic enrollment information was obtained. No data are imputed.

Full-time enrollment was defined for both undergraduate and graduate students as a minimum of 30 semester or 45 quarter hours per academic year. Part-time enrollment was defined for both categories as less than 30 semester or 45 quarter hours.

Institutions were instructed to exclude students enrolled in noncredit adult education classes, students enrolled only for short courses, correspondence students, auditors, or students studying abroad. Institutions with more than one campus were instructed to report enrollment figures for the campus name indicated. Main campuses were asked to report figures for students enrolled at the main campus only. Central administrative offices were not surveyed.

Presentation of the Data

This report provides detailed information on fall 1985 enrollment at 3,093 colleges and universities that offer undergraduate study. The institutional data are preceded by six tables that summarize the data included in the report:

Table 1 describes the universe of surveyed institutions by control and type and indicates the percent distributions in each category.

Table 2 compares undergraduate enrollments for fall 1984 and fall 1985. Figures in this table represent only those institutions eligible to be surveyed in both years. The total n is 3,031 or 98% of the universe.

Table 3 compares undergraduate enrollments for fall 1984 and fall 1985 by attendance status, i.e., full-time and part-time enrollments. Only institutions supplying full-time/part-time figures for both years are included.

Table 4 lists total first-time freshman enrollments for those institutions reporting data for both fall 1984 and fall 1985. The total n in this table is 2,746 or 89% of the surveyed institutions. Table 5 presents comparative data for first-time freshman enrollments by sex of students.

Table 6 presents graduate enrollments for fall 1984 and fall 1985 at the surveyed institutions (see Table 1) and an additional 167 institutions that offer graduate study only.

The institutional data are divided into two sections: Undergraduate Enrollment, Fall 1985 and Graduate Enrollment, Fall 1985. Each section lists state totals followed by institutions in alphabetic order within state. The following information appears in tabular form for both the undergraduate and graduate levels: full-time enrollment (total, men, women), part-time enrollment (total, men, women), first-time freshmen enrollment, and total students enrolled (including undergraduate and graduate).
